GMO STATEMENT

Agroport-D Kft. bred its registered tobacco varieties and variety candidates only by conventional breeding methods.

The male and female parents of the varieties are maintained by Agroport-D Kft. by conventional breeding techniques.

All registered and grown tobacco varieties and variety candidates bred by Agroport-D Kft. are free from any genetic modification (non-GMO), which is proved by the analysis results of independent laboratory.

GMO statement and GMO analysis result of independent laboratory related to the specific variety are handed over at seed purchase upon request.
